ABOUT COMPANY INFORMATION

A blend of engineering and innovation!

Vertikol Elevator, with over 14 years of industry experience, is a trusted name in elevator manufacturing, trading, supplying, and installation. Based in Palghar, a leading business hub in Maharashtra, we are guided by a strong vision and mission to deliver excellence through engineering and innovation. As one of the top elevator manufacturers in Palghar, India, we specialize in providing high-quality, reliable, and safe vertical transportation solutions. Our extensive product line includes Glass Capsule Lifts, Traction Lifts, Bungalow Lifts, Hospital Lifts (Stretcher Lifts), MRL Lifts, Goods Lifts, Elevator Safety Sets, Elevator Cabins, Doors and Door Frames, Elevator Door Headers, and more. Quality is embedded in every stage of our process, ensuring unmatched performance, durability, and customer satisfaction. At Vertikol Elevator, we go beyond building elevators, we install confidence and elevate everyday experiences.

DYNAMIC LEADERSHIP

Under the leadership of Mr. Karuna Nidhan, our young and dynamic founder, we are growing at a rapid speed. Within a short span of time, Vertikol Elevator has emerged as a leading manufacturer and supplier of a variety of elevator and accessories.

TOWARDS A BRIGHT FUTURE

We are growing at a rapid pace, riding on clients' trust! Our presence across major cities of Maharashtra and India demonstrates people's trust in our quality and confirms our credibility in the market. In this era of a fast-paced world, elevators are assuming substantial importance, enabling people to reach from one floor to another floor comfortably, especially in a high-rise corporate tower, multistory apartment, or a shopping mall. Vertikol Elevator designed and engineered elevators are the charisma of engineering and innovation, an ideal vertical mobility solution!

BUNGALOW LIFT

Vertikal Elevator brings luxury, convenience, and accessibility to your home with our state-of-the-art bungalow elevators. Specially designed for low-rise residential spaces, our elevators combine elegant aesthetics with advanced technology to provide smooth, silent, and safe vertical transportation. Whether you're looking to enhance mobility for elderly family members or add a touch of sophistication to your multi-floor bungalow, Vertikal Elevator ensures a customized solution that suits your space and style.

As a trusted name in the elevator industry, Vertikal Elevator offers compact, energy-efficient bungalow lifts that are easy to install and maintain. Our expert team ensures end-to-end service, from design consultation to installation and AMC support, delivering unmatched performance and long-term value. Elevate your lifestyle and property value with Vertikal Elevator's reliable and beautifully integrated home elevators tailored to your bungalow's unique layout.

HOTEL LIFT

Vertikal Elevator provides high-performance hotel elevators that combine speed, safety, and style to enhance guest satisfaction and streamline hotel operations. Designed for frequent use and smooth movement between floors, our elevators offer quiet operation, spacious cabins, and elegant finishes that complement any hotel interior. From compact lifts for boutique hotels to high-capacity systems for large properties, Vertikal Elevator delivers reliable and customized solutions tailored to the hospitality industry's needs.

RESORT LIFT

Vertikal Elevator offers premium elevator solutions tailored for resorts, combining aesthetic elegance with seamless performance. Our resort elevators are designed to enhance guest experience with smooth, silent rides and stylish interiors that blend perfectly with luxurious resort environments. Whether it's a beachfront villa, hillside retreat, or multi-storey resort property, our elevators ensure effortless mobility and a memorable impression for your guests.

At Vertikal Elevator, we understand the unique needs of the hospitality industry. Our resort elevators are engineered for high durability, frequent usage, and energy efficiency. From panoramic glass lifts that offer scenic views to compact passenger elevators for villas, we deliver fully customized solutions with expert installation and 24/7 service support. Trust Vertikal Elevator to elevate your resort's comfort, style, and operational efficiency.

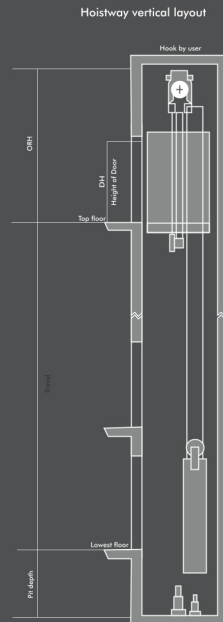

At Vertikal Elevator, we provide a wide spectrum of innovative vertical mobility solutions designed for diverse environments. Our Passenger Elevators offer smooth and safe rides for residential and commercial buildings. The Automobile Elevators are perfect for efficient vehicle movement in showrooms and parking structures.

For healthcare facilities, our Hospital Elevators ensure hygiene, space, and reliability. Add a touch of luxury with our visually stunning Panoramic Elevators, or rely on our robust Freight Elevators built to transport heavy goods with ease. Choose Vertikal Elevator for technology-driven, high-performance lift solutions tailored to your needs.

MRL Lift

**SAVE MACHINE
ROOM SPACE AND
EMPOWER YOUR
ARCHITECTURAL
VISION**

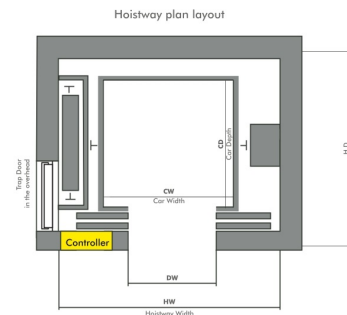

The abbreviation MRL stands for Machine Room Less. It means the MRL lift is a unique lift that has no specific machine room, leading to unique features, like efficient energy consumption. Since the lift is devoid of machine room, it occupies relatively less space, making it ideal for buildings wherein there is a crisis for space. So, if your society, apartment, or any other building is facing a space crisis, then do consider MRL lift.

Salient Features :

At Vertikol Elevator, we are committed to quality. MRL Lift is a testimony to our commitment to quality. Here are some of the salient features identified with our lift:

- Energy efficiency
- Low weight
- Better utilization of hoist space
- Occupies less space

In addition, our range is durable, making it a worthwhile investment!

Traction Lift

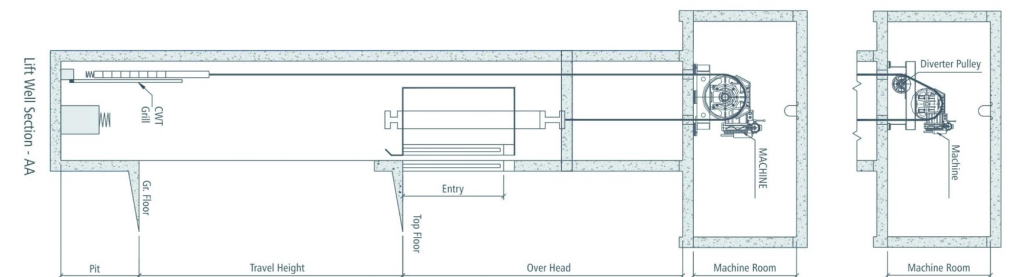

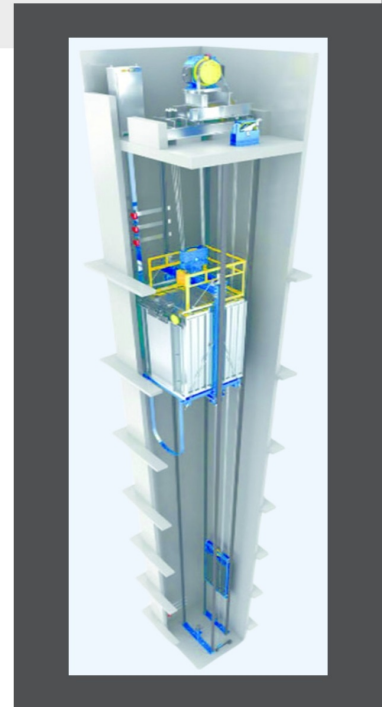

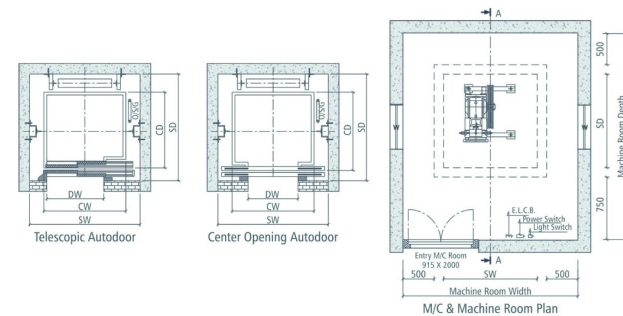

Traction Lift is one of our specialties. Over the years, this type of elevator has assumed considerable importance, driven by its plenty of salient features. Traction mechanism-based elevator is engineered for applications wherein rapid speed, continuous travel, and heavy lifting capacity are anticipated.

Salient Features of Traction Elevator

Traction Lifts from Vertikal Elevator are widely known for demonstrating plenty of salient features, including:

- Energy-efficient
- High speed
- Comfort and luxury
- Low maintenance
- Sturdy design

In addition, our quality-driven range is also durable. It means it's worth investing in.

Hospital Lift

As indicated by its name, the Hospital Lift is designed and manufactured for the healthcare sector, including hospitals, multispecialty hospitals, and clinics. These specialized lifts are also known as Stretcher Lifts. As a reputed elevator manufacturer in Palghar, India, we ensure our Hospital Lifts are built with precision to meet the specific needs of the healthcare industry.

Intellectual Control

Noise Reducing

Smooth and Comfortable

Hospital lifts are ideally designed for the safe and secure movement of patients, their kin, patient beds, stretchers, medical equipment, doctors, and nurses, from one floor to another in a hospital. Since every second counts in healthcare, Hospital Lift came into existence, enabling patients to swiftly get access to medical facilities.

Critically ill patients need immediate medical support. Imagine a patient who has met an accident. By using a Hospital lift, the patient is carried from the gate to the lift, from here, he/ she is moved to the emergency or ICU care. Thereby, saving precious time.

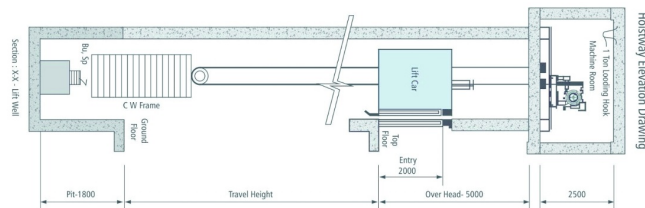

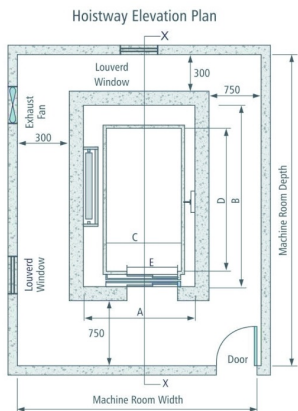

Unique Features of Hospital Lift

Our premium range of Hospital Lifts is popular across the market for demonstrating various unique features, including:

Our range is identified with numerous features, including:

- Safe & Reliable
- Spacious
- Brilliant speed
- Durability

In addition, Veer Elevator's premium quality medical lift is also energy-efficient. It's a lift worth investing in!

Goods Lift

Bear any heavy load at ease, easy transport

As reflected by its name, the Goods Lift is designed and manufactured to move goods, from one floor to another. In industry circles, this type of elevator is also famous as a cargo, material, or freight lift.

The robust Goods Lift is a remarkable solution to meet the various challenges of movement of freight in an industry ecosystem, including factories corporate towers, supermarkets, shopping malls, multiplexes, airports, warehouses, hospitals, hotels, industrial plants, etc.

Since, this type of elevator is designed for transporting different types of heavy loads, like spare parts, furniture, building materials, and finished goods, it is sturdy, allowing it to endure the pressure and tensions of loads.

Lift car structure being sturdy and durable

Highly accurate flat layer more secure

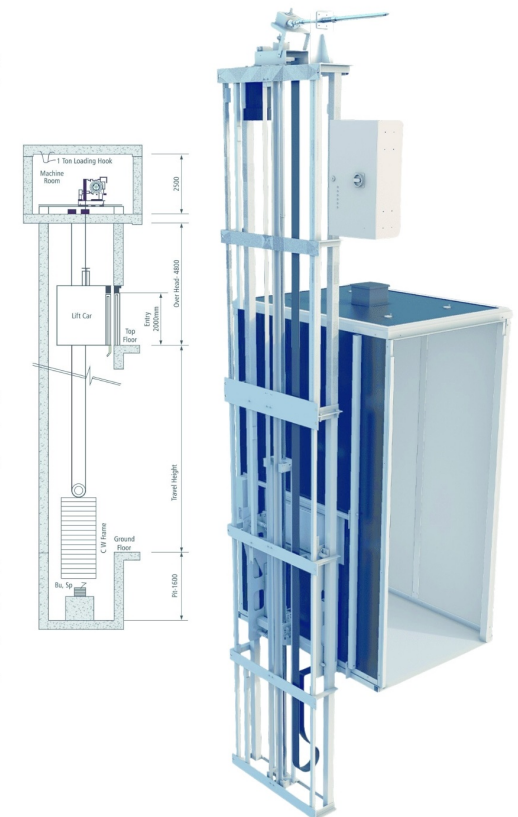

Unique Features

Our range of quality-driven Goods Lift is famous for demonstrating a variety of unique features, including:

- A powerful hoisting machine
- Wide doors
- Spacious in design
- Sturdy material
- Durable

Unlike residential or hotel lifts, the Goods Lift's interior isn't appealing or aesthetic for obvious reasons. It isn't designed for the movement of passengers.

We are manufacturing cargo lifts in different capacities. Choose the capacity that best meets your industrial requirements. Whatever may be your industry or capacity, we have a solution ready for you!

Glass Capsule Lift

Smooth operation comfortable travel

The Glass Capsule Lift from Vertikol Elevator is a classic example of design, engineering, and innovation. Aesthetic interiors, high-end large transparent glass panels, and a mesmerizing finish allow riders to experience a panoramic view of the surrounding area while moving upward or downward.

Perhaps, you might have come across this type of wonderful lift during your visit to a shopping mall or multiplex in your area. The innovative design is also popular for further elevating the beauty of buildings, be it corporate towers, shopping malls, multiplexes, or hotels. In addition, bungalows and residential apartments are also installing these designer elevator for obvious reasons.

As a leading elevator manufacturer in Palghar, India, we ensure our Glass Capsule Lift adds elegance and functionality to your space. If the exterior of the building is what matters most in your business, then the Glass Capsule Lift is definitely made for you.

Why choose the Glass Capsule Elevator?

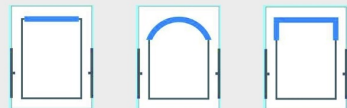

There are plenty of reasons to choose the quality-driven lift, including:

- Appealing aesthetics
- Designer interior
- Premium quality glass doors for panoramic view
- High speed
- Safe & comfortable
- Low maintenance

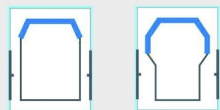

Customized Glass Capsule Elevator

Our professionally qualified team of engineers and technicians holds vast experience in delivering customized elevator. You don't have to worry about your specific requirements. Meet our team to discuss your custom design, like interior, capacity, features, exterior, material, etc.

There is a variety of forms to meet different needs.

CAR Frame Set

MRL Car Frame Double Pulley on top from back to Front side

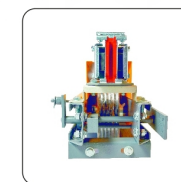

Main Features:

- M. 5 Powder Coated car frame set is designed from Sheet Metal to give more rigidity, stability and durability to the Lift.
- Made from Mild Steel sheet metal of 3mm, 4mm, 5mm and 6mm Thickness.
- Satisfying higher load carrying capacity with lighter weight
- All Car frame equipped with imported roller type instantaneous safety to ensure utmost safety to passenger traveling in the car.
- 1:1 & 2:1 Car frame parts are fixed with standard & progressive Type safety gear.
- Car Frame comes with imported guide shoes to provide smooth and silent operation of the lift and designed to ensure easy maintenance.

Car Frame Top

Car Frame Top

Product Description :

- Double pulleys on top from back to front side with back counterweight available for MRL Lift.

General Features :

Max. Load Capacity = 1400 kgs (20 Passengers)

Max. Speed = 1.0 m/s

Min. DBG = 1180

Max. DBG = 1480

Interior Clear frame with or cabin Outside: DBG 80mm

Adjustable Guide shoes with imported roller type instantaneous safety mechanism.

2:1 Roping MRL Car Frame From Back to Front Side Double Pulley

Standard Accessories

- Pistol Type Thimble
- Pulley Cover
- Buffer Spring
- Counter Guide Shoes
- Main Guide Shoes
- Oil Cups
- Rope Fixing Plate
- Counter Grill

Folding 2:1 Roping Counter Frame

Safety Features

• Infrared Light Curtain

Full height infrared curtain with multiple crisscrossing light beams detect the smallest obstruction in door path and stop doors from closing.

• Overload Sensor with Audio-Visual Indication

On overload of the lift, car audio-visual indication is provided and doors are kept open till excess load is removed.

• Slot Less Door Sills

Stainless steel lift car is now complemented by matching stainless steel bottom sills. Moreover, bottom sills are groove less, thus enhancing aesthetic appearance of the elevator. No slots for dust to accumulate and obstruct the door. So trouble free operation is ensured. Ensures smooth movement of trolleys & structures. (Block-A)

• Car Emergency Light & Fan

The emergency light is always illuminated in normal condition and switches itself automatically to battery back up in case of power failure as shown in picture. Fan also operates for minimum 2 minutes after power failure.

• Emergency Alarm & 'Push to Talk'

In case of any emergency or power failure, help can be obtained by alarming or by communicating at lobby through system, which is battery operated and self-charging as shown in the picture.

• Emergency Rescue Button

In the event of power failure, trapped person in lift car rescue themselves by pressing emergency rescue button provided in car panel as shown in picture. (Block-B)

• Safety in case of Over Travel

Three phase electric power is disconnected from control panel and motor, the moment elevator car moves beyond the limit of top and bottom terminal floors causing immediate application of the brake to bring the elevator to halt.

• Safety in case of Rope Breakage

In the incident of breakage of ropes, elevator speed exceeds the rated speed in the downward direction, due to gravitational acceleration. The over speed governor activates the clutch mechanism thereby switching off main controls and jamming the elevator car safety on guide rails.

• PU Buffers

Polyurethane polymer blocks along lasting, weather resistant and most reliable in all operating conditions for providing maximum safety, in case of buffering of car elevator.

• Car Fan Automatic Sleep

Car fan automatically stops when there are no registered floor calls resulting into saving in power and enhancing its life.

• Voice Annunciator with Music

This system provides detailed information to passengers related to next floor, direction of movement, door opening/closing, scheduled operations and other information depending on the building needs. This system features natural electronic voice synthesizes.

• PLC based controller V3F (Variable voltage, Variable Frequency), Vector controlled drive with encoder closed loop system

This system provides the highest degree of smoothness in elevator car movement with precise leveling. In addition to this, the frequency of power conservation is very high resulting into an overall power saving of the order of 40% during normal operating conditions.

The Speed vs. Travel diagram shows the jerk less movement of elevator car approaching different floors with different speeds during starting, accelerating, decelerating and stopping.

• Self diagnostic system

The built-in computer control system, self-diagnosis, various operational and safety parameters to improve overall reliability and safety of lift operation.

• PLC based controller V3F (Variable voltage, Variable Frequency), Vector controlled drive with encoder feedback closed loop system for door operation

This system reduces the door opening and closing time drastically compared to conventional door operation system, thereby improving the passenger handling capacity and reducing the waiting time at landing.

CANTILEVER MACHINE BASE ELEVATOR

Vertikal Elevator, a trusted elevator manufacturer based in Palghar, Maharashtra, proudly offers precision-engineered Cantilever Machine Base Elevators designed for durability, stability, and space optimization. Built with a robust cantilevered structure, this elevator system provides a reliable solution for buildings where a traditional machine room or overhead space is limited.

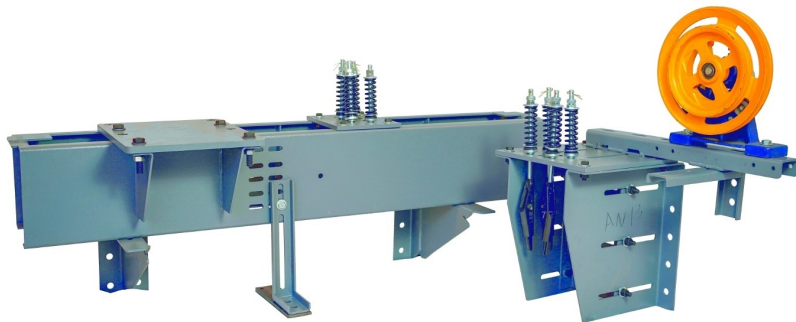

The Cantilever Machine Base Elevator is especially suitable for sites with structural limitations, where conventional elevator systems may not be feasible. Its design minimizes load impact on the building structure by anchoring the machine base to one side of the shaft, ensuring enhanced stability and long-term performance. This setup not only simplifies installation in narrow or retrofitted shafts but also provides greater flexibility in architectural planning — a significant advantage for developers and engineers.

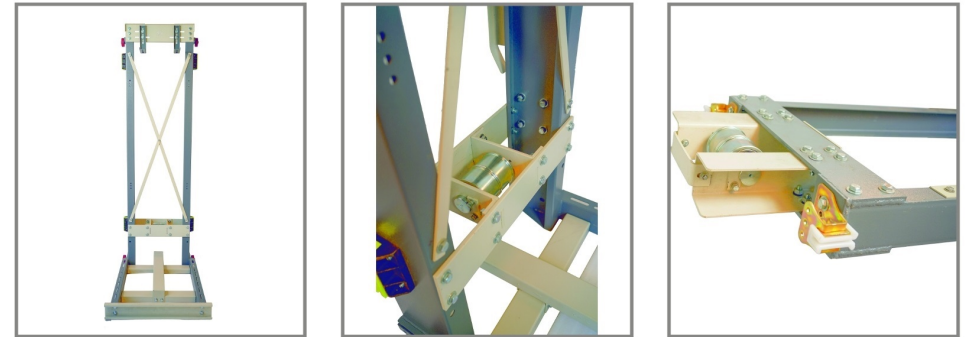

MRL BASE

Vertikal Elevator, a leading elevator manufacturer based in Palghar, Maharashtra, specializes in advanced MRL (Machine Room-Less) Cantilever Base Elevators that combine space efficiency with cutting-edge engineering. Designed to eliminate the need for a traditional machine room, this system integrates the traction unit within the shaft itself — making it an ideal solution for modern high-rise buildings and space-constrained projects. The cantilever base design offers excellent structural balance, load support, and easy adaptability to different shaft conditions.

Built with precision and top-quality materials, our MRL Cantilever Base Elevators ensure smooth and energy-efficient operation while maintaining maximum passenger safety. With reduced construction cost, lower energy consumption, and streamlined maintenance, these elevators offer a smart, future-ready alternative for both residential and commercial use. Trust Vertikal Elevator to deliver reliable, high-performance vertical transportation tailored to today's architectural needs.

BELT DRIVE SET

At Vertikal Elevator, based in Palghar, Maharashtra, we specialize in designing and manufacturing high-performance Belt Drive Set Cantilever Car Frames for elevators. Our cantilever car frames are engineered with precision to offer superior balance, smooth operation, and excellent load distribution. With a focus on quality and durability, we ensure that every component meets the highest safety and performance standards, making our solutions ideal for residential, commercial, and industrial elevator systems.

Our Belt Drive Set Cantilever Car Frames are built using robust materials that enhance strength while minimizing vibration and noise during elevator movement. Designed for easy installation and low maintenance, these frames are compatible with a wide range of elevator types and cabin designs. Whether you are installing a new system or upgrading an existing one, Vertikal Elevator provides tailor-made solutions that maximize space efficiency and deliver a comfortable, stable ride experience for passengers.

As a trusted name in the elevator manufacturing industry in Palghar, Maharashtra, Vertikal Elevator combines innovative engineering with a customer-first approach. We not only supply reliable Belt Drive Set Cantilever Car Frames but also offer complete support, from consultation to after-sales service. Choose Vertikal Elevator for high-quality, reliable elevator components that elevate your project's success.

At Vertikal Elevator, every Belt Drive Set Cantilever Car Frame is crafted with attention to precision engineering and strict quality control measures. Our advanced manufacturing processes and high-grade raw materials ensure that each frame delivers long-term reliability even under heavy usage. The belt drive system, combined with the cantilever design, provides optimal balance and enhances energy efficiency, making it a smart choice for modern, sustainable buildings across Palghar, Maharashtra, and beyond.

We understand that every project has unique requirements. That's why Vertikal Elevator offers customization options for Belt Drive Set Cantilever Car Frames, ensuring seamless integration with different elevator capacities and shaft dimensions. Our experienced technical team supports clients throughout the process — from initial design consultation to installation guidance — ensuring a smooth and hassle-free experience. Partner with Vertikal Elevator and bring unmatched performance and safety to your vertical transportation systems.

CONTROLLER

The Safe and More Energy-Saving Integrated Control

Energy efficient and simple to use: our panels put you in control over your elevator systems. Vertikal Elevator has been installing and servicing elevators for more than a decade. Vertikal Elevator brings Millennium's most advanced energy-saving VVVF elevator system with highly sophisticated Microprocessor-based Pulse Width Modulation (PWM) technology. Vertikal Elevator's complete integrated VVVF control system ensures the best return on investment.
